Dear Bud, 12/2/82

We both thank you for the invitation and we wish we could be with you (all), but we've no way of getting there.

Have you given any thought to the potential of a favorable decision by the appeals court in the spectro/NAA case?

Suppose they remand for trial to determine whether the tests should be duplicated? I think the press could underst and this and begin to wonder why those results do not exist. They could be helped by the unrefuted case record, of course, and any real attention to it could be helpful.

If we get a remand, this time I think I'll want Pratt recused.

Hope you are all well and happy.

Remember us to Pattie.

Best wishes,
